

# Soundly - Stream Deck Profile & Icon Pack

## Contents

After extracting the ZIP file, you will find two folders named **Icons** and **Profiles**. These folders contain:

- Over 200 icons (including variations) in multiple colors.
- Stream Deck + (8 button, 4 knob and touch strip) profiles for Windows and Mac.
- Stream Deck (15 button) profiles for Windows, Mac, and phones.
- Stream Deck XL (32 button) profile for Windows, Mac, and tablets.

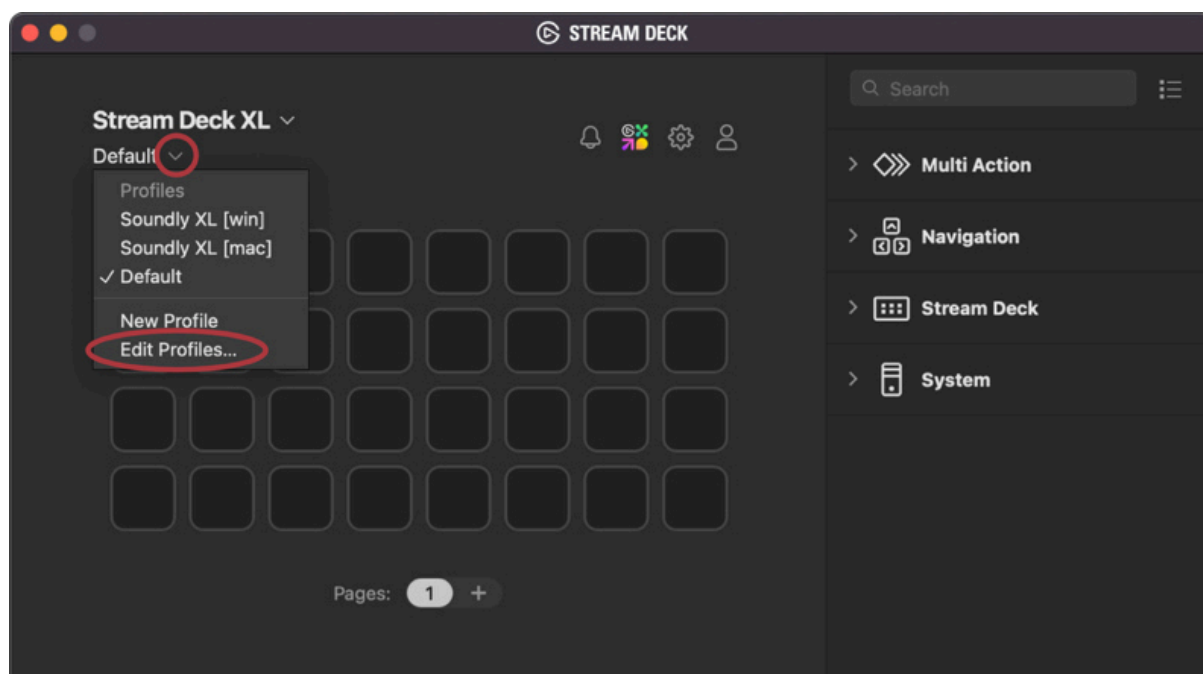

The package includes 2 profiles for the 8-button Stream Deck +, 2 profiles for the 15-button Stream Deck and 1 for the 32-button Stream Deck XL. Each profile is available for both Windows and Mac. The 15 and 32-button profiles also work with the Stream Deck Mobile software, so you can use these profiles with your phone or tablet. The 15-button profile works best for phones, and the 32-button profile works best with tablets.

Some of the icons in this pack have one or more variations and can easily be changed out.

Further instructions on importing profiles and changing icons are detailed in the subsequent pages.

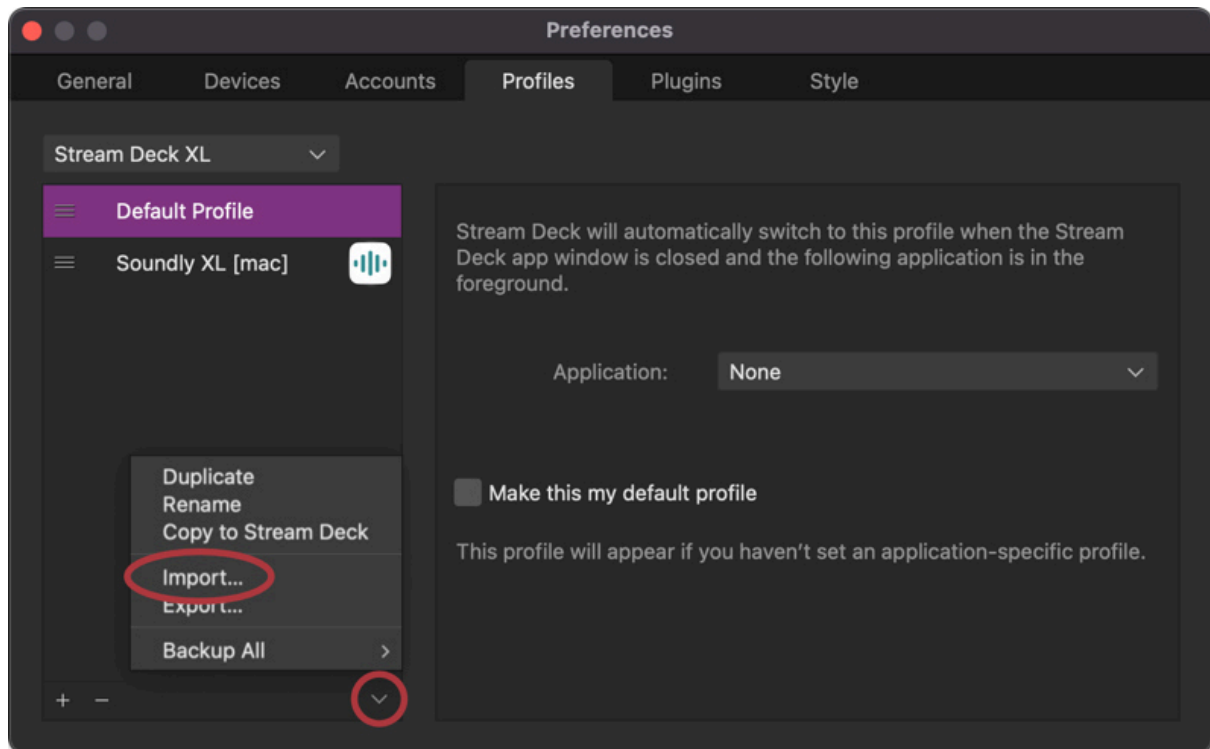

## How to Install a Stream Deck Profile

To install a Stream Deck profile, either double-click the **.profile** file or access the Stream Deck application, click the down arrow next to the profile name, and select **Edit Profiles**.

In the **Preferences** page of the Stream Deck software, you can manage profiles: create, remove, rename, import, export, and associate profiles with applications.

To import a profile, click the down arrow at the bottom of the profile list and select **Import....** Then, find and select the desired profile.

## How to Auto Switch to the Soundly Profile

The Stream Deck can be set to switch automatically to the Soundly profile when using Soundly.

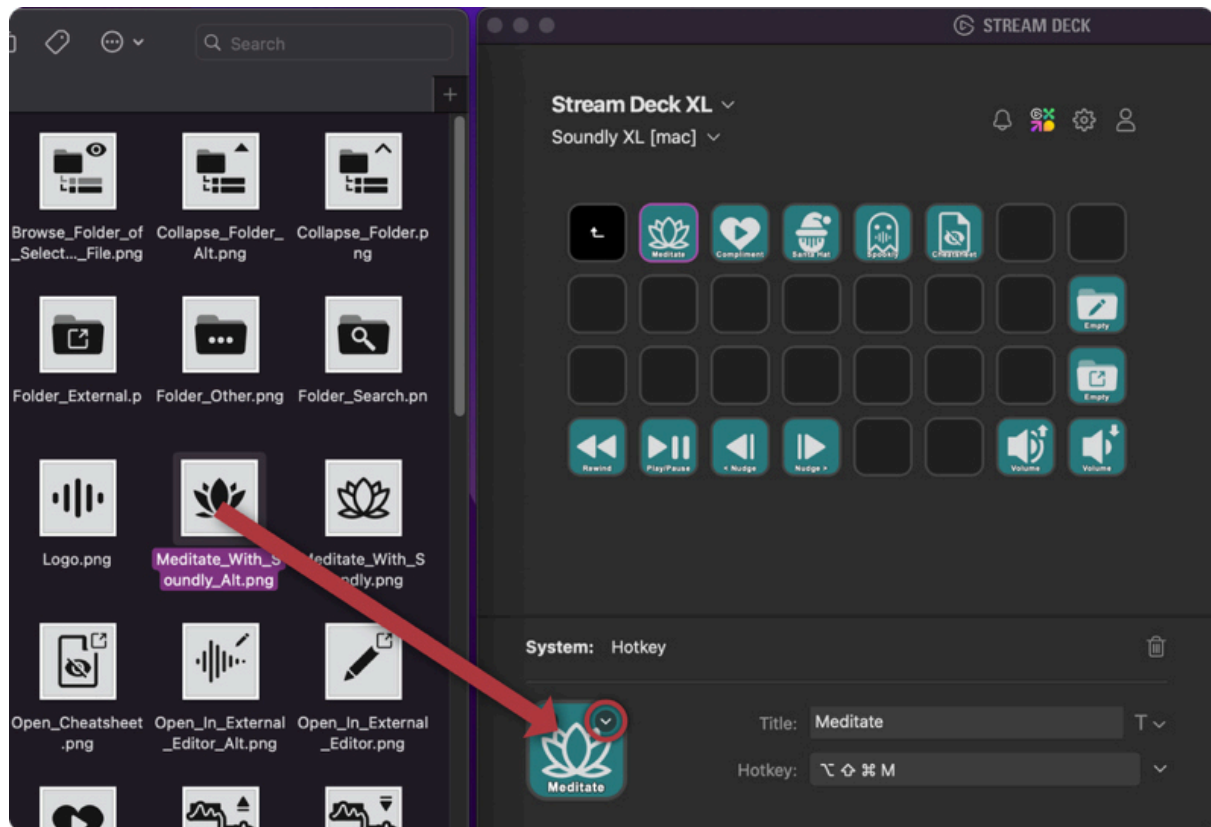

In the **Preferences** page, as earlier described, select the Soundly profile from the list. On the right side of **Preferences**, use the **Application:** dropdown to associate the selected profile with an application.

## How to Change Icons

You can change the icons on any button on the Stream Deck. The Soundly Stream Deck Profile and Icon pack come with over 200 icons in multiple color options.

To modify an icon, drag it from Finder/Explorer onto the square edit area of the desired function, or click the down arrow as shown below and select **Set From File**. Optionally, you can remove the title text here.

## Acknowledgements

Special thanks to Øivind Rosvold from [Audio Ikons](#) for his incredible work in creating the icons and profiles for this pack. Audio Ikons offers tailored visual aids for audio professionals, simplifying and enhancing the workflow in sound design and production.

[Audio Ikons](#) is currently offering a **20% discount** for Soundly users on other Audio Ikons products with the coupon code **SOUNDLY-20**.

We hope the Stream Deck integration will be helpful!

*Team Soundly* and  **AUDIO IKONS**
